# ABOUT US

## End-to-End Innovative Dosing Solution

Based in Southern California, Cannapresso® is a trusted global OEM partner offering end-to-end supply chain solutions for hemp-derived vaping products. Since 2009, we've pioneered innovation with advanced R&D, decades of expertise, and a commitment to top-tier quality—helping leading brands move seamlessly from concept to shelf.

# End-to-End Solution

Cannapresso® offers a comprehensive suite of services to help brands bring highly demanded, high-quality products to market quickly, efficiently, cost-effectively and risk freely.

Our services cover the entire product lifecycle, helping you gain competitive advantage in your market. From design to engineering, from manufacturing to after-market services, we help you reduce costs, improve speed to market, enhance profit and revenue, and drive innovation.

## 01 Design

## 02 Filling

## 03 Co-packing

# Design

## Hardware Design

Our robust portfolio of leading-edge technologies help you reach your markets faster, reduce spending and capital expenditures in R&D and manufacturing process, and enhance your position in the market.

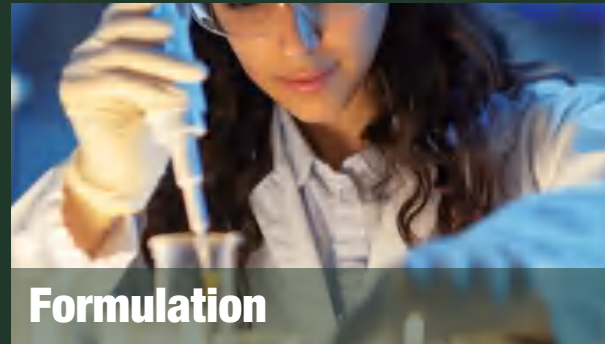

## Packaging Design

Our expertise in design and engineering not only help you get to market quickly, but also help you get the products which define the market. From concept to prototype, from proof-of-concept services to pre-production and ramp transfer, from volume manufacturing to delivery, we enable you every step of the way, faster and with the highest quality.

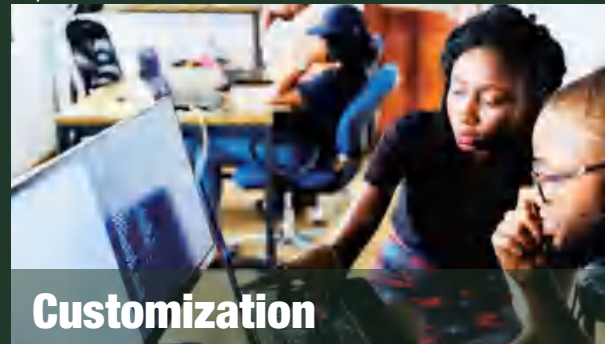

## Certification

Cannapresso® helps you accelerate critical approval, verification, and quality management processes while ensuring regulatory compliance. From raw hemp materials, to extraction method, and manufacturing process, Cannapresso® adheres to Current Good Manufacturing Practices (cGMP), to ensure the final products are safe, reliable and of top quality.

## Formulation

Cannapresso's experienced professionals of 40 strong formulation development experts and flavorists are able to provide our customers with top notch formulas that meet regulatory standards and exceed consumer expectations.

## Customization

For more than 15 years, Cannapresso® has helped brands bring their unique packaging ideas to life, and at the top of competition. From the creative concepts to delivery of finished products, Cannapresso® is committed to quality, service, and timeliness.

## Lab Testing

CNAS laboratory accreditation covers a wide range of fields, including product testing, environmental monitoring, medical testing, food testing, etc. It provides important support for safeguarding product quality, environmental safety and public health.

# Filling

Our automatic liquid filling machine can fill 300 cartridges, disposable or pods in just 30 seconds. Fully automatic high-speed blending and filling equipment and state-of-the-art facilities designed to suit unique and large-scale market needs. In our filling process, we address the most common quality issue like oil leakage—by employing our advanced testing systems and highly mechanized SOPs. This ensures consistent quality and reliability in every batch.

# Child-Resistant Packaging

Keep your products safe with Cannapresso's certified child-resistant packaging solutions.

# Co-packing

Cannapresso® excels in transforming distinctive packaging concepts into competitive advantages. Our state-of-the-art automated packaging system optimizes efficiency and precision, elevating productivity. Leveraging deep industry expertise and innovative methods, we utilize advanced silk-screen printing to deliver a refined brand presentation and offer certified child-resistant packaging for superior product safety.

# Automatic Packaging Machines

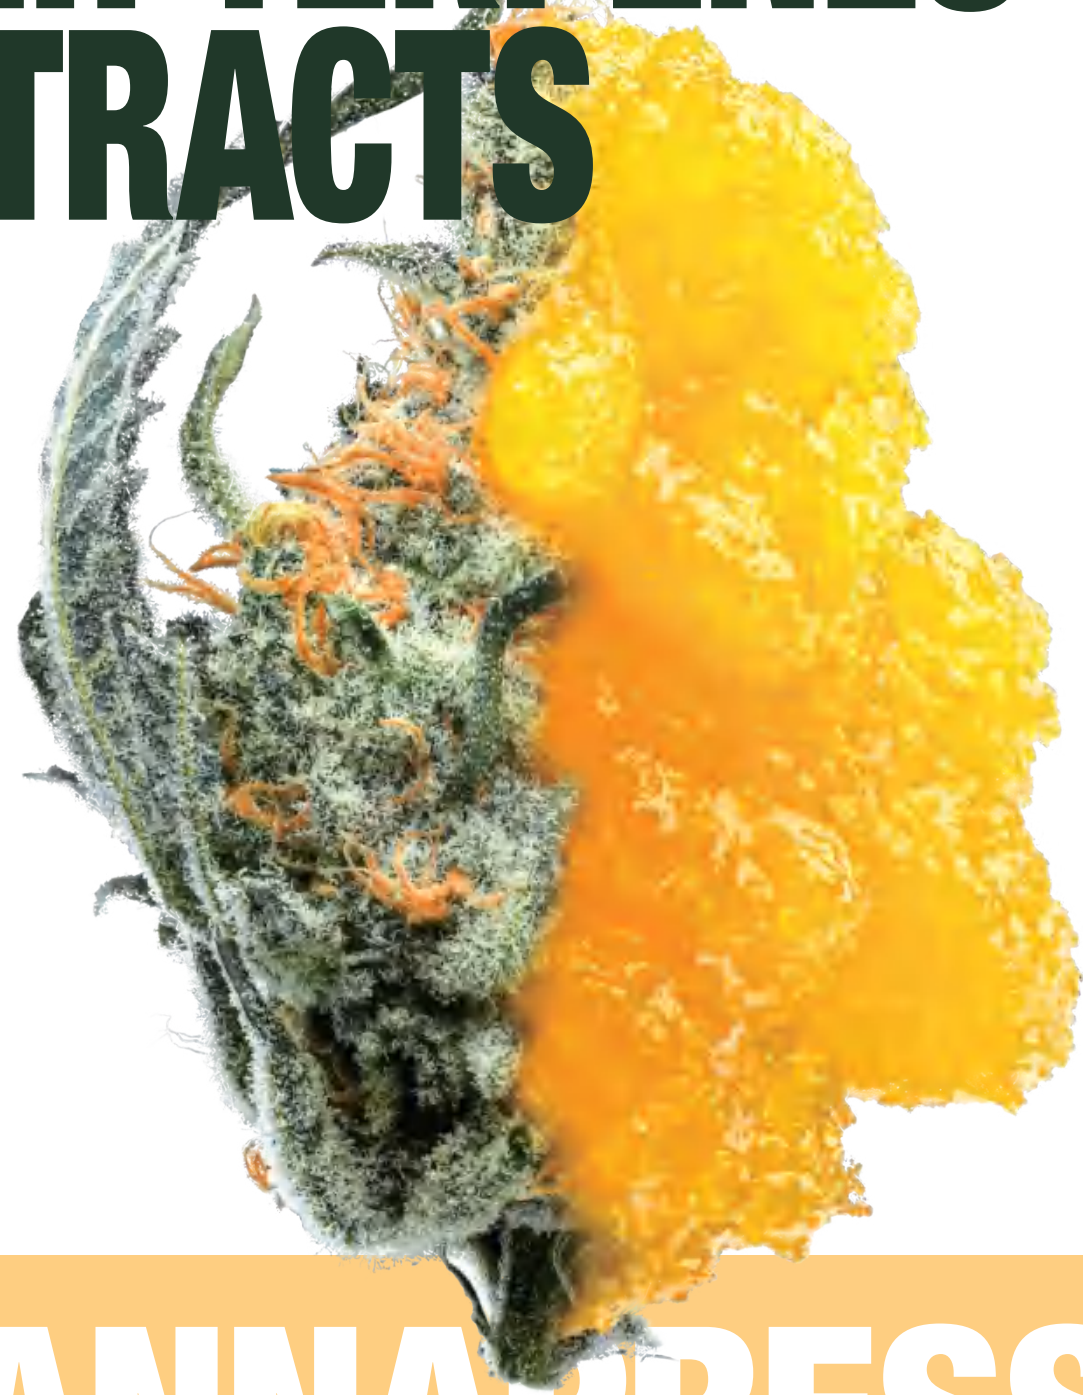

Benefit from our automatic packaging machine capable of packaging 100 boxes per minute accommodating various box sizes.

# Box Type Display

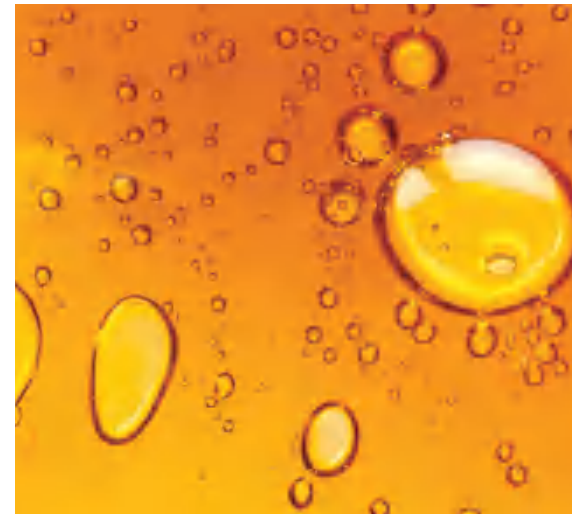

Cannapresso employs advanced packaging techniques and has years of experience in the cannabis industry, specializing in the end-to-end packaging of retail products.

# CANNABINOIDS & HIGH TERPENES EXTRACTS

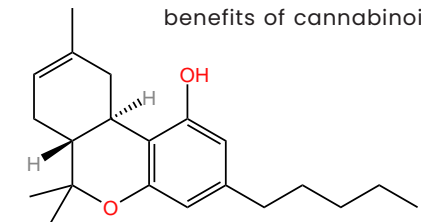

# CANNAPRESSO

## BASIC

### Delta 8 THC ( $\Delta 8$ THC):

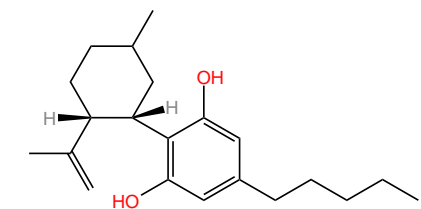

"Discover the balanced experience of Delta 8 THC, the exciting cannabinoid that's creating a buzz in the wellness community. With a smoother profile than Delta 9 THC,  $\Delta 8$  THC provides a clear-headed, calming sensation that's ideal for those looking for a milder cannabis experience. It's the contemporary choice for enjoying the

benefits of cannabinoids without intense psychoactivity."

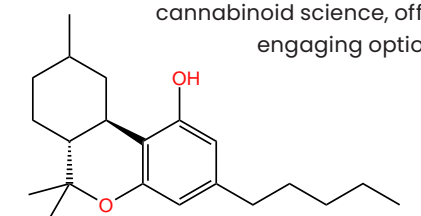

### CBD (Cannabidiol):

"Embrace CBD, the cannabis plant's superstar, celebrated for its diverse potential benefits. CBD's non-psychoactive nature has made it a favorite for supporting relaxation, focus, and more. It's become a trusted component of health and wellness routines nationwide, offering a gentle and versatile approach to well-being."

### HHC (Hexahydrocannabinol):

"Explore the innovative world of HHC, the breakthrough cannabinoid that's capturing attention for its distinctive characteristics. As a hydrogenated version of Delta 9 THC, HHC delivers a novel experience that's providing a new dimension to the cannabis landscape. It's the choice for those eager to experience the latest in cannabinoid science, offering a distinct and engaging option for connoisseurs."

**THCA**, or Tetrahydrocannabinolic Acid, is the acidic precursor to THC, and it's gaining attention for its unique properties.

"Meet THCA, the raw and potent precursor to the more well-known THC, found in its natural, untouched state within the cannabis plant. Often referred to as the 'whole plant experience,' THCA is the starting point of the cannabis journey, offering a rich, full-spectrum profile that's brimming with potential.

With a gentle, non-psychoactive profile, THCA is the choice for those looking to connect with the plant's more nuanced effects. It's the essence of the cannabis plant, preserved in its raw form, and it's becoming a

favorite among health-conscious consumers who appreciate the less processed, more natural approach to wellness.

THCA is like a key that unlocks the full potential of the cannabis plant. It's the starting line for a range of beneficial compounds that are just waiting to be discovered. Whether you're an experienced cannabis enthusiast or new to the scene, THCA represents the next frontier in cannabinoid exploration, providing a clean, pure, and unfiltered experience."

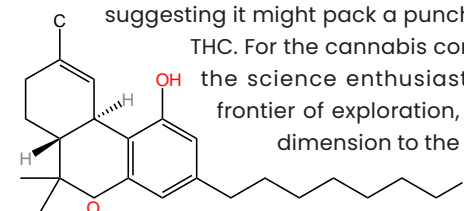

**PREMIUM**

**LUXURY**

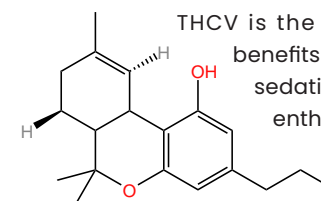

### THCP (Tetrahydrocannabiphorol)

"THCP is the new kid on the block, a recently discovered cannabinoid that's turning heads with its potential. It's being talked about for its potency, with some suggesting it might pack a punch stronger than THC. For the cannabis connoisseurs and the science enthusiasts, THCP is the frontier of exploration, offering a new dimension to the plant's effects."

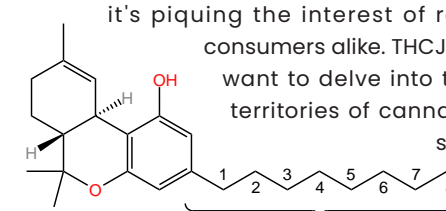

### THCV (Tetrahydrocannabivarin)

"THCV is making waves as a cannabinoid with a quick rise in popularity. Known for its potential to provide a clear-headed and energetic experience, THCV is the go-to for those seeking the benefits of cannabis without the heavy sedation. It's a favorite among fitness enthusiasts and daytime users who want to stay sharp and active."

### THCJD (Tetrahydrocannabinol-JD)

"Step into the realm of THCJD, a rare and intriguing cannabinoid that's still somewhat of a mystery in the cannabis world. With a unique molecular structure, it's piquing the interest of researchers and consumers alike. THCJD is for those who want to delve into the less-charted territories of cannabis compounds, seeking out the rare and potentially powerful."

### THCX (Tetrahydrocannabinol-X)

"THCX is the X-factor in the world of cannabinoids, a compound that's still unfolding its secrets. Early indications suggest it might offer a unique set of effects, different from the standard THC experience. For those who are all about trying the latest and most innovative in cannabis, THCX is the cutting-edge choice, promising an experience that's distinct and full of potential."

# HIGH TERPENES EXTRACTS

## Delta 8 Live Resin

Dive into the crystal-clear world of Delta 8 Live Resin, where high terpene extraction meets pristine purity. This extract is the epitome of sophistication, offering a transparent, colorless canvas that reflects the meticulous cultivation and processing techniques behind it. Experience the rich, unadulterated flavors and aromas of Delta 8, where every hit is a celebration of natural cannabis excellence.

## Delta 8 Live Rosin

Savor the exquisite Delta 8 Live Rosin, a high terpene extract that's as pure as it gets. This golden, translucent treasure is the result of a solventless process, ensuring that every dab is a direct expression of the plant's original essence. Indulge in the smooth, clean taste that has made Delta 8 Live Rosin a favorite among connoisseurs seeking nothing but the best.

## Liquid Diamonds

Unearth the brilliance of Liquid Diamonds, where Delta 8's high terpene extracts are captured in a symphony of clarity and potency. Each drop is a sparkling testament to the purity and refinement of Delta 8, providing a clean, transparent vaping experience that's as smooth as it is satisfying. Liquid Diamonds is the choice for those who demand only the finest, most luxurious Delta 8 extracts.

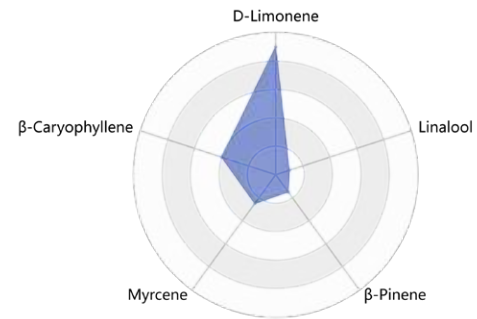

Cannapresso's terpenes are meticulously extracted to ensure the highest quality and purity. Terpenes are the aromatic compounds found in plants, trees, fruits, vegetables, herbs, and many other naturally occurring organisms that contribute to their distinct scents and flavors. Our terpenes are 100% derived from natural sources, capturing the full spectrum of flavors and aromas.

What makes our terpenes exceptional is their authenticity and potency. Through advanced extraction techniques, we preserve the delicate balance of compounds that provide a rich and true-to-nature flavor profile. This ensures that our terpenes not only enhance the sensory experience but also deliver the therapeutic benefits associated with these compounds.

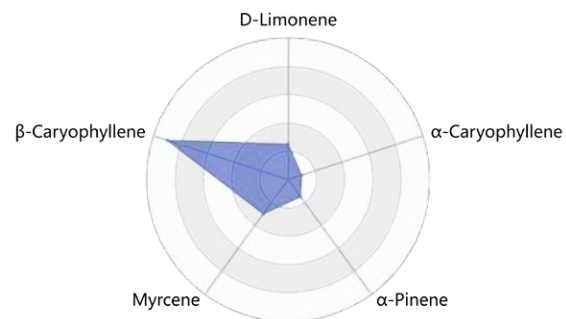

Consumers often seek terpenes for their flavor, aroma, and potential health benefits. Our rigorous quality control measures guarantee that our terpenes are free from impurities and contaminants, providing a pure and effective product. Organic and food-grade. Choosing Cannapresso means choosing terpenes that are scientifically crafted for superior quality, ensuring an unparalleled experience.

# FORMULATION

Cannapresso® is renowned for its dedication to crafting exceptional taste experiences. All Cannapresso® products are formulated with the highest quality ingredients, where quality and safety always remain a top priority.

High potency, hybrid, or somewhere in-between, Cannapresso’s experienced professionals of 40 strong formulation development experts and flavorists are able to provide our customers with top notch formulas that meet regulatory standards and exceed consumer expectations.

## CANNAPRESSO

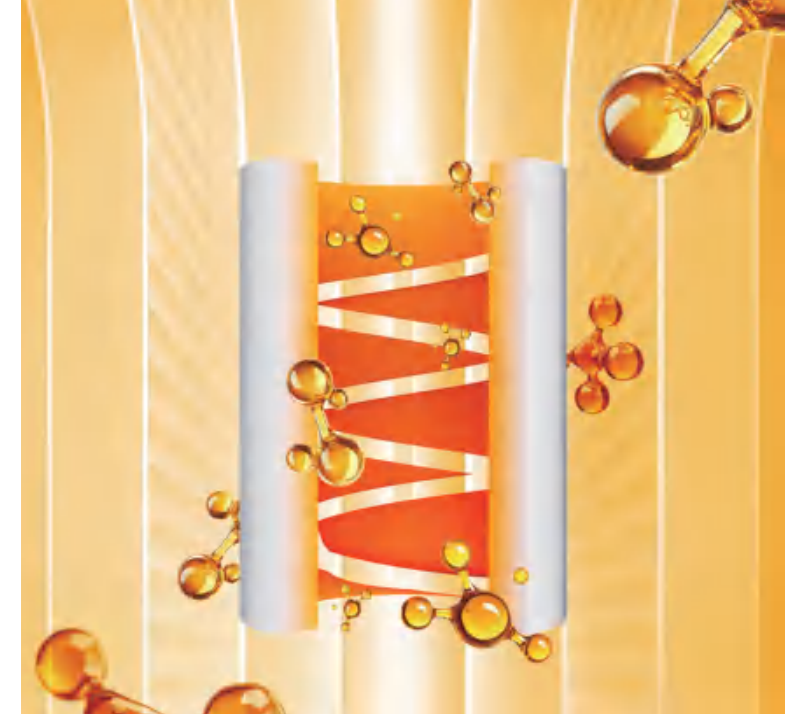

- ✓ Leading hemp industry solutions
- ✓ Ensuring reliability and innovation
- ✓ Enhancing lives through quality offerings

## AI-MESH

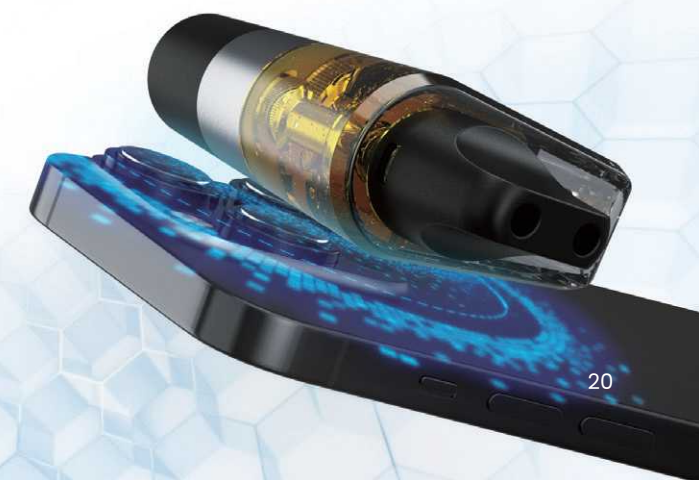

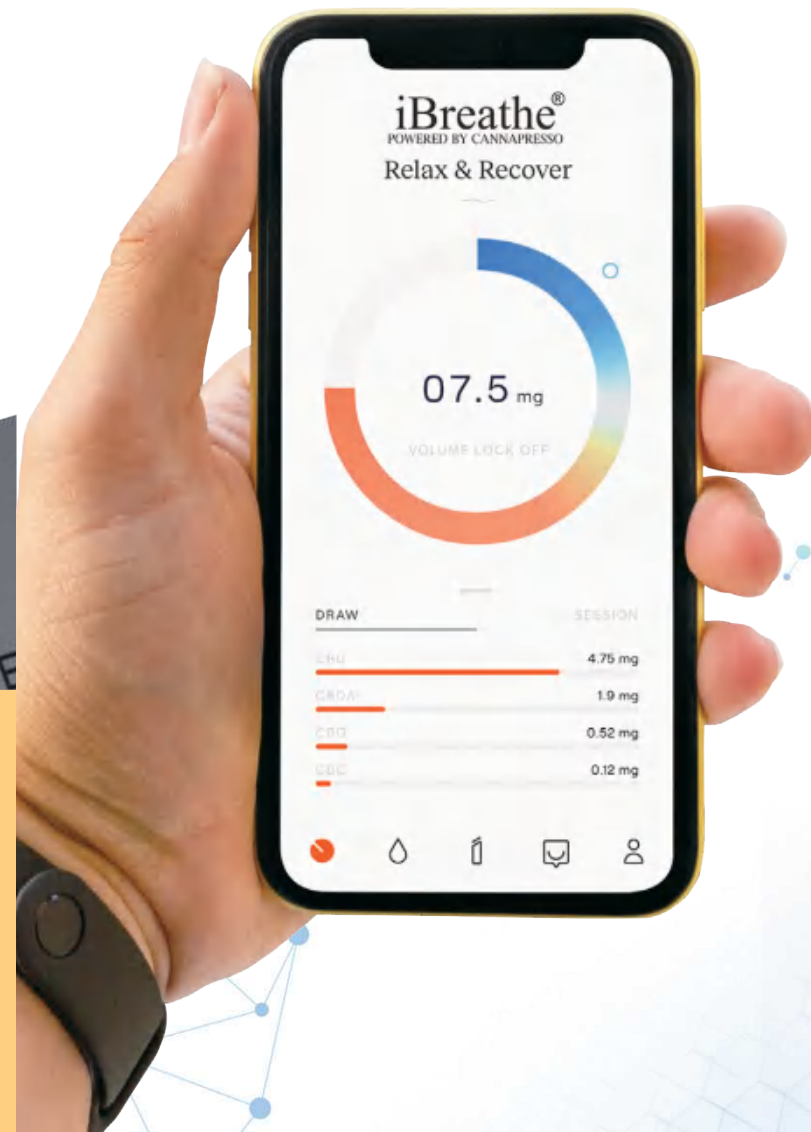

Our hemp vaporizer features AiMesh technology, which uses AI to analyze inhalation data and adjust the heating coil's temperature and power in real-time. This ensures optimal vaporization, preserving terpenes and flavor compounds while maintaining precise dosing for a consistent and effective experience.

AiMesh balances temperature perfectly, addressing issues of flavor degradation and insufficient vaporization, and caters to specific therapeutic needs through accurate dosing.

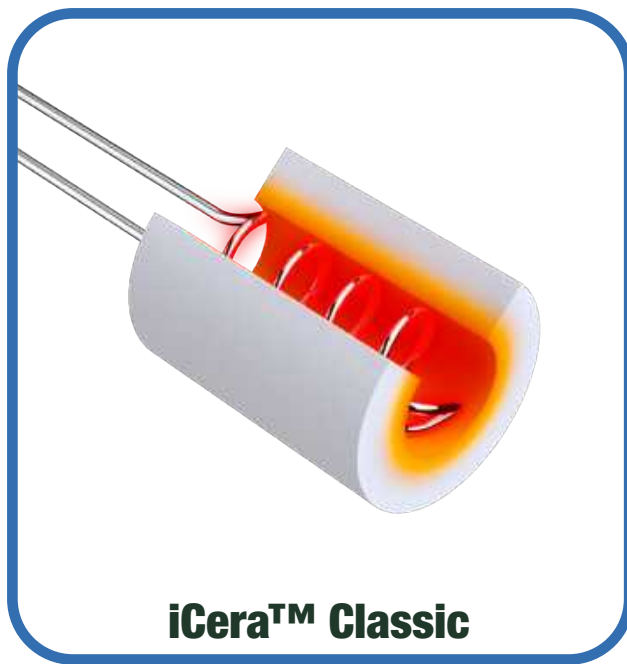

## IPREFER TECH

The world's first Intelligent-Dosing tech that precisely measures and controls your hemp intake – putting Ai-powered health managing right in your hands!

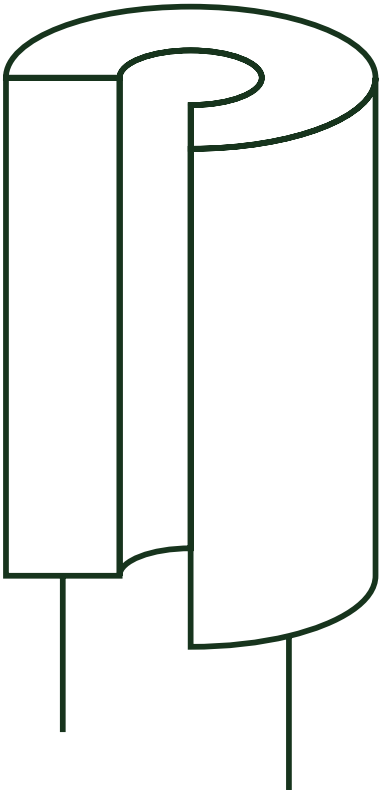

**Classic Ceramic**

The iCera™ Classic Ceramic represents a classic ceramic option renowned for its consistent flavor delivery and high cost-effectiveness. This ceramic heating element offers stable performance, making it a reliable choice for users who prioritize a balanced taste experience and value for money. Its enduring design ensures that users enjoy a dependable and enjoyable vaping experience without breaking the bank.

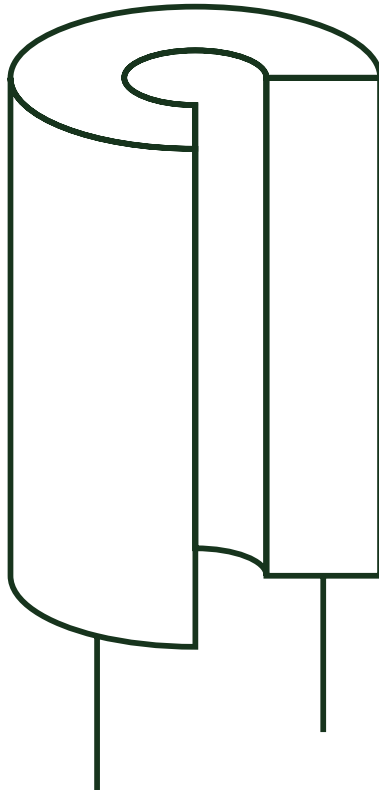

**Mesh Etched Ceramic**

The iCera™ Mini Ceramic features a mesh-etched ceramic design that enhances the flavor profile while significantly increasing the volume of vapor produced. This advanced ceramic element improves the overall vaping experience by delivering a richer taste and denser smoke. Ideal for users looking for a flavorful and more substantial cloud production, the Delta Mesh Ceramic combines innovation with performance.

**High-Power Compatible Mesh Ceramic**

The iCera™ Ultra Ceramic is engineered to support ultra-high power settings, making it suitable for producing large vapor clouds akin to those of a traditional smoking experience. The mesh-etched ceramic design of the Ultra Mesh ensures optimal heat distribution and flavor retention even at higher power levels. This ceramic element is perfect for enthusiasts who seek maximum vapor production and robust flavor.

**Square Mesh Etched Ceramic**

The iCera™ Tablet Ceramic features a unique square-shaped mesh-etched design without a central post, offering a distinct appearance and functionality. This innovative design allows for improved consumer perception and is particularly well-suited for use with live rosin. The tablet format ensures efficient heating and enhanced flavor, catering to those who appreciate both aesthetic appeal and high performance in their vaping devices.

# FeelmixX® High-End Aroma Molecule Mixing Technology

FeelmixX®, powered by Cannapresso®, is a premier technology in high-end aroma molecule mixing. With over a decade of expertise in flavor blending and premium aroma creation. FeelmixX® represents an advanced molecular blending technology that seamlessly combines the therapeutic properties of cannabinoids with the sensory appeal of modern e-liquids.

## Multi-Layered Aroma Composition

- Top Note: A fresh and vibrant scent felt immediately upon inhalation.
- Middle Note: A soft, complex aroma that develops mid-vape.
- Base Note: A deep, warm finish that lingers, enhancing satisfaction.
